

Quick Installation Guide

150Mbps Wireless N Nano USB Adapter

MODEL NO. TL-WN725N

Package Contents

System Requirement

· Windows XP · Windows Vista · Windows 7 · Windows 8

1 Hardware Connection

You may see the **Found New Hardware Wizard** after the adapter has been inserted. Please click **Cancel**.

2 Software Installation

(The installation procedures in Windows XP/ Vista/ 7/ 8 are similar. Here we use the procedures in Windows 7 as an example.)

- 1** Insert the TP-LINK Resource CD into the CD-ROM drive.

- 2** Find the model TL-WN725N, click it, and then select **Install Driver&Utility**.

Note You will be prompted to choose the setup language from a drop-down list of 14 languages; then click **OK** to proceed. As follows we take English setup for example.

- 3** The **InstallShield Wizard** window will appear. Click **Next** to continue.

- 4** Select **Install TP-LINK Wireless Configuration Utility and Driver**, and then click **Next**.

- 5** Click **Change...** to specify the destination location or you can leave it default. Click **Next** to continue.

- 6** Click **Install** to install the driver and utility for your adapter.

- 7** The installation process may take 1~2 minutes.

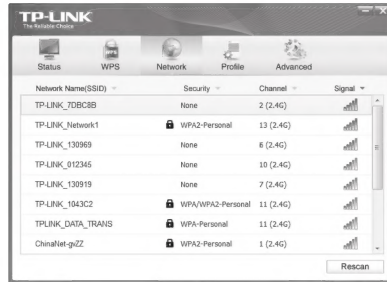

- 8** The following screen will then appear. Click **Finish** to complete the setup.

3 Connect to Network

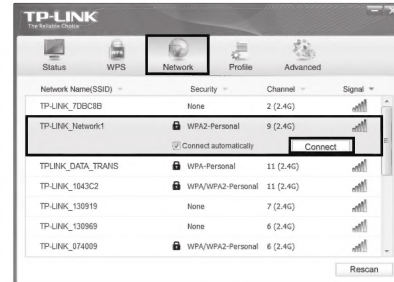

(You can skip to **Appendix: Connect to Wireless Router by WPS** to quickly connect to a network if your Router or Access Point features WPS/QSS function.)

- 1 After installation, the configuration page will pop up on your desktop.

Note The icon  will appear on your desktop. Double-clicking on the icon can start the utility.

- 2 Click **Network** in the tools section to display a list of available wireless networks. Highlight the target network name (e.g. TP-LINK_Network1) and then click **Connect** to build a connection.

Note Here we only choose a wireless network with the security type of **WPA/WPA2-Personal** as an example to elaborate the following steps.

If you want to know more about the connection to a wireless network with the security type of **WPA/WPA2-Enterprise**, please refer to the User Guide on the resource CD included.

- 3 If the network is unsecured, you will directly connect to it. If it is secured (with WPA/WPA2-PSK), there are two ways to connect to it.

Method One:
Input the wireless password into the **Security Key** field and then click **OK** to continue.

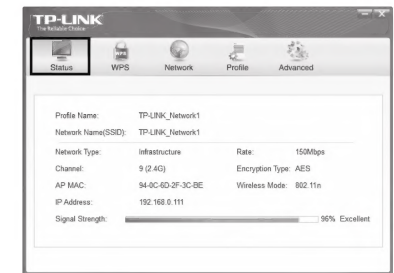

Method Two:
Without entering a key, push the WPS/QSS button on your Router as hinted "You can also connect by pushing the button on the router". Then click **OK** to continue.

- 4 The following screen indicates successful connectivity. Click **Close** to enjoy the Internet.

- 5 To view more information about the network connected, click **Status** in the tools section.

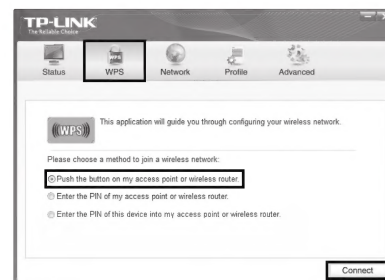

Appendix: Connect to Wireless Router by WPS

If your wireless Router features the WPS/QSS function, you can also set up a wireless connection in this way.

Note For more configuration methods of WPS, please refer to the User Guide on the Resource CD.

- 1 Push the **WPS/RESET** button on the Router. (Here we use Router TL-WR841ND as an example.)
- 2 Launch the configuration utility and click **WPS** in the tools section. Select **Push the button on my access point or wireless router** and then click **Connect**.

- 3 Wait for the connection process to complete. The following screen indicates successful connectivity. Click **OK** to finish the WPS connection.
